Nazione	Repubblica Popolare Cinese

PRODOTTI O MACCHINARI

Manufacturer of glass straight line edging machine, straight line bevelling machine, shape grinding machine, computer-aided shape glass cutting machine.

The straight line bevelling grinders TG251B-A, TG371B and TG371B-A employed chainless rolling structure for transportation and very stable. Coarse and fine grinding heads are both motor-connected to reduce vibration and raise the quality of products. The machines are equipped with automatic and manual operated oil-lubricating system, so that the machines are operated under a good oil-lubricating condition. By using PLC programmable controller to carry out automatic and manual control and LCD screen display, it can preset the thickness of glass to be processed, the remained thickness after grinding and the width of bevelling edge, and so. It is very easy to operate.

TG371B-A straight line bevelling machine uses a rail-elevating mechanism and has all the merits of TG371B. The minimum grindable glass is 25mm and the maximum width is 60mm. The quality of products is stable. Besides, the machine is equipped with automatic rear-chain plate to guarantee grinding quality.

TG383E\TG353E\TG272\TG262 AND TG252 straight line edging machines all have stable performance and high efficiency.

TGBL11 wave straight line bevelling machine, LB-600 six-arm shape grinder, TGSBM1616\ TGSBM2522\TGSBM3022\TGSBM4022 straight line double edge grinders, TGYM1 single-head circular-edge and TG522Y nine-head straight round-edge grinder are machinery newly developed in Champion. In cooperation with the Italian IANUA SPA, we made the computer-aided shape glass cutting machine. Champion Glass Machinery Co., Ltd. is the only glass machinery company in China, which has been supported by Italian techniques.

TGBL11 wave straight line bevelling machine is capable of grinding not only bevels, but also from edges. It is an upgraded product for glass processing.

LB-600 six-arm shaped grander can grinding edges of several glass objects simultaneously. This machine works stable and very effectively, and is applicable to batch processing.

TGSBM1616\TGSBM2522\TGSBM3022\TGSBM4022 double-edge grinders are basically used for straight-line edging of large flat glass with high efficiency and high reliability.

The computer-aided shape glass cutting machine is controlled by the CNC system. All procedures can be done programmable at a time. It is suitable for batch intensive glass processing.

Company Profile of **Champion Glass Machine Co., Ltd.**
