PRODOTTI O MACCHINARI

The production of Shinan Mould is made up of casting, machining and inspection, three working area. The application of digital machine tool in machining glass mould greatly improves development of glass mould industry, moreover, we make every component by global advanced CNC machine tool to insure precision of mould machining. We adopt compound milling machine to process planes of shaping die, original die and neck-ring die to make them exchange each other. Unique clamps ensure the parallelism and uprightness of outer round as well as slot and joint surface, and ensure equality of outer round and joint surface to create perfect oriented condition for following working procedures, which can prolong life-span of die under the working condition of high temperature and high speed. We adopt international advanced technologies of plasma spraying and coating as well as argon arc welding to deal with damageable borders, angles and joint parts to achieve excellent performances such as thermal stability, antiwear characteristics, corrosiveness-resisting characteristics, balance resistance, etc. Meanwhile, our company imports latest inspection equipments and establishes very strict inspection program for each working procedure and inspection procedure to guarantee products' quality. The YG2.5D image projection apparatus we using can magnify 10-50 times, so none tiny appearance error can escape. And the advanced software can accurately measure capacity of moulding chamber at high speed.

Products:

Foodstuff bottle
Drink bottle
Wine bottle
Cosmetik bottle
Medicine
Lamp, vessel

Company Profile of **Changshu Shinan Mould Co., Ltd**

A service of glasssglobal.com, an affiliate of glasssglobal group.
