- > Maximum in individuality
- > Any Batch Sizes, from single packages to objects
- > Truthful, Extensive Consultation towards Clients needs
- > Rely on years of experience in the field
- > Orders can be places in full or only labor

OUR PRODUCT SPECTRUM

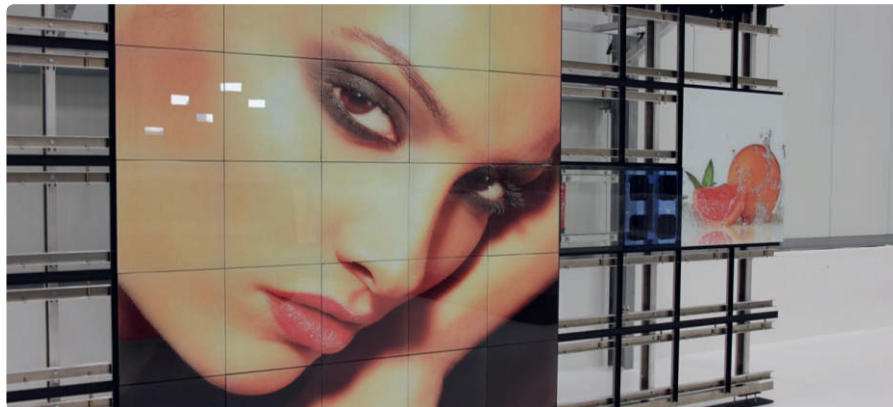

ALL GLASS DOORS & -SYSTEMS

1 All Glass Doors

Our All-Glass Doors distinguish through a maximum of individuality. All products are designed for your needs individually and are laminated on our own LamiPress®.

Further than only the aspect of design, the lamination offers an added safety factor to the products through the lamination.

The process of the LamiPress® guarantees the highest level of quality on the market. From single laminates to entire glass systems, we strive to fulfill your demands and expectations

2 Glass Systems

Our glass systems offer a variety in usage options. From the interior shower panel over to the exterior, the LamiPress® covers all the Client needs.

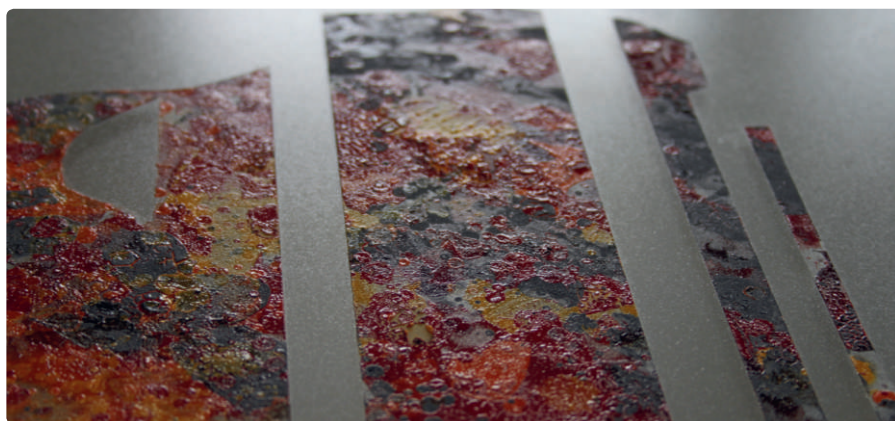

Any usage site, any geometry and any design are possible. Thanks to the futuristic technology of the LamiPress®, customers can rely on excellent Safety Glass Quality.

With our SentryGlass®-products, we provide a unique look even when it comes to overhead glass panels.

3 Glass Art

Whether it is restauration or replacement glass work, painted glass remains a big part of the industry. Hand-painted pieces or interlayers are elaborate unique pieces which are hard to replace or replicate.

Profit from an absolute safe process with the LamiPress®, with which these valuables are reliably laminated.

4 Design

Take advantage of our extensive Know-How in the field of Glass Design. Any geometries and colors are possible. Further on, we can imitate the look of mirror optics, serigraphy or gold foil while under the market prices.

The LamiPress® provides the option to combine the factors of design and safety into one, for example with a SentryGlas®-Sefar-Fabric lamination.

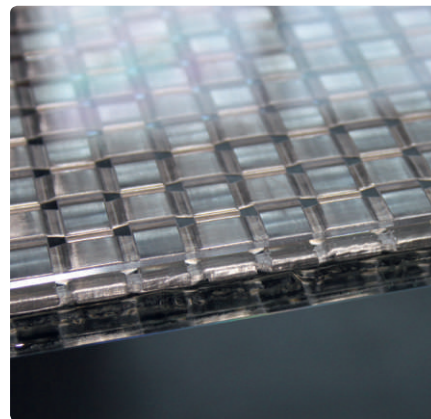

OUR PRODUCT SPECTRUM

MATERIAL & FUNCTION

5 Extraordinary Materials

No more need to limit your creativity. With the LamiPress®, one can overcome any task, no matter the challenge. Organic materials, metals and multiple stone types have already been laminated into safety glass in multiple projects.

6 Functionality inside Glass

Technically demanding functionality glass products are on the rise. Take advantage of our expertise when it comes to Smartglass, Safety Glass with SentryGlass® or (post)laminated Fire-Protection glass.

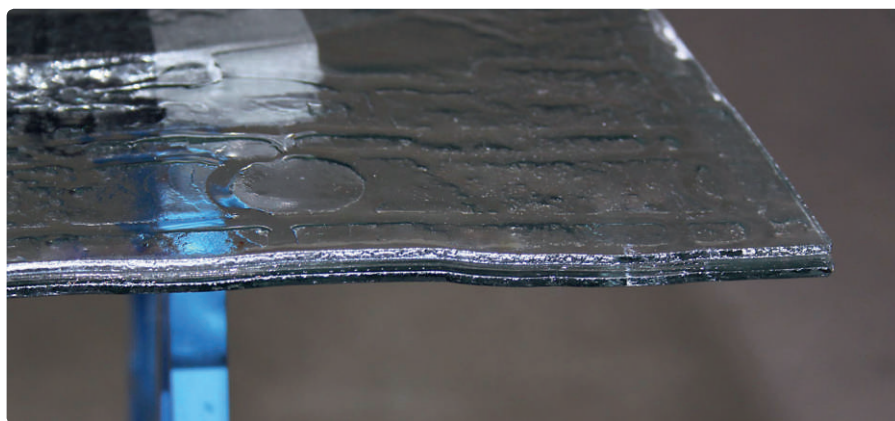

The technological advancement of the LamiPress® provides exquisite quality while offering attractive margins.

7 Demanding Solutions

You are experiencing difficulties finding the ideal solutions for your more demanding projects?

Looks no more and rely on the perfected process LamiPress® for bubble-free, uneven Ornament Glass or rounded Laminates with SentryGlass®. Embedded mounts and shifted multi-layer laminates with narrow tolerances are only a few examples to name when it comes to outlining the technological advancements of the LamiPress®.

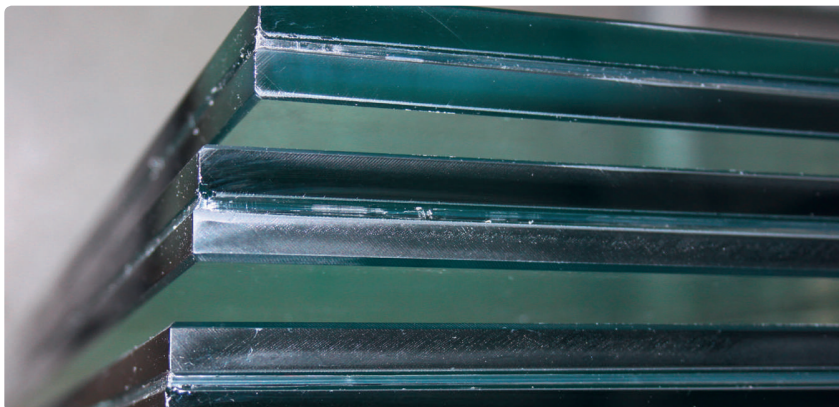

8 Quality Documentation

Self-evidently we hold certificates for a variety of products.

Next to the regular Safety Glass approval and Safety Glass approval with printed PVB interlayers, we are authorized to offer laminates such as P6B, P7B, P8B, BR4NS and BR6NS as fully certified.

Visit www.lami-press.de/qualitaetsdokumentation/ to download all of the certifications.

A Printed PVB interlayer, laminated

B Print on adhesive film, laminated with EVA
