PHONOSORB® High Performance Desiccants for the Insulated Glass Industry

The most important property of window glass is its transparency, enabling a clear, unobstructed view.

We cannot influence what you see, but we can certainly influence the way you see it; we can help you to maintain a clear view over an extended period of time, avoid glass deformations, and keep the airspace dry.

For over 25 years, our philosophy has been to serve the IG market with excellent products backed by detailed information and advice concerning the optimum use of these products.

PHONOSORB® molecular sieves have been specifically engineered to help maintain your IG window quality, performance, and reliability.

The consistent structure and composition of PHONOSORB® desiccants provides glass manufacturers with the required adsorption characteristics to ensure the quality of their products.

Our product range includes:

PHONOSORB® Molecular Sieve Beads
PHONOSORB® Blends for Fogging Prevention
PHONOSORB® MTX® LD Polymer Desiccant
