PRODOTTI O MACCHINARI

Fibers made of mineral wool and glass as well as technical papers, mesh fabrics and protective fabrics

We see ourselves as an active developer and manufacturer of fiber products that are resistant to high temperatures, non-combustible and thermally and acoustically effective for the automotive industry as well as other industry branches on a worldwide basis.

This involves our own development and production of the fiber in itself as raw material as well as further processing of the fiber to more finished designs of a product.

DBW Advanced Fiber Technologies secures its top position especially with the products DBW powertex® and DBW biosil®.

These products have been especially developed for the acoustical absorption and thermal insulation that exhaust systems need. They find its use in the entire exhaust system from the area of the manifold to the rear muffler.

Company Profile of **Asglatex Ohorn GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
