## PRODOTTI O MACCHINARI

Advantages of the VITROSEP System:

**CLOSED CIRCUIT OF WATER WITH COOLANT**  
Minimized water and coolant consumptions.

**PARTICLES STAY IN SUSPENSION**  
Prevents glass particle sedimentation on machines and pipes.

**DRY WASTE**  
Easy disposal. Reduction in water and coolant consumption.

**COMPLETELY CLEAN WATER**  
Can be used for internal cooling of the spindle of the CNC machines. The VITROSEP water is like the tap water, with the benefit of using coolant.

**COMPACT, FLEXIBLE AND MODULAR SOLUTION**  
Minimum space required. Automatic adaption to changing working conditions. The capacity can be easily increased.

**THESE ARE THE RESULTS OF WORKING WITH CLEAN WATER AND COOLANT**  
Better performance of the diamond tools.  
Durability of the diamond tools increased by up to 50%.  
Electric consumption of grinding machines reduced by up to 50%.  
Best efficiency in glass processing due to optimal working conditions.  
Cleaner machines. Lower maintenance cost.

## STORIA

VITROSEP was founded on 1992 as a company dedicated to solve a problem common for all the industries involved in glass processing: the glass particles.

The initial idea was to perform a physical separation by centrifugation. The process proved ineffective, so a new technology was developed. The way was long and full of difficulties but the objective was finally reached.

Nowadays, thanks to VITROSEP, customers in 5 continents are working in a more profitable and environmentally friendly way.

Our technical department is capable to achieve a broad spectrum of projects in the flat and optical glass industries. We have production facilities, technical support and supply of spare parts and consumables. Bearing in mind the continuously changing world we live in, we continue our research and quest for a better service to our customers.

### Company Profile of **Vitrosep S.L.**
