Nazione	Francia

PRODOTTI O MACCHINARI

Widely used by architects and designers in projects that demand superb transparency, Planibel Clearvision is the perfect choice when crystal-clear vision and total clarity count. With the introduction of two new thicknesses, the Clearvision range now offers a wide variety of thicknesses ranging from 3 mm to 19 mm, enabling top designers and furniture makers to work with thicker low-iron glass for larger pieces.

Planibel Clearvision is produced in Boussois, France (3 to 12 mm). For the 15 and 19 mm version (Cuneo, Italy), a special technology is used to ensure perfectly uniform thickness, making the glass easier to process (cutting, laminating, etc.). In addition, the product's extra-clear, neutral colour is the same in all thicknesses. Even in 15 and 19 mm, Clearvision is perfectly neutral – proof of just how pure this product is.

Planibel Clearvision is Cradle to Cradle Certified™ Bronze. We focus on developing products that have a positive impact on the environment during their lifetime. By committing to C2C standards, AGC can deliver high-quality products while protecting people and the environment, and supporting its customers in their socially and environmentally responsible purchasing decisions. More than 75% of our products are Cradle to Cradle Certified™.
