PRODOTTI O MACCHINARI

Silica Sands

The HCA Mountain Minerals silica operations mines and processes high purity glass grade silica sand for diverse industrial applications. Our SILWITE® products have a purity ranging from 99.15% to 99.55% SiO₂, well exceeding the requirements for silica sand ceramic grade and foundry grades. Our products have extremely low iron oxide content, and therefore will not interfere with the color of the end products.

The SILWITE® product line is used in several industrial applications such as: feedstock for glass manufacturing, foundry sand, additive in refractory cements and ceramics, as well as a functional filler/extender for high durability paints.

SILWITE® fine, white sands are used as bunker sand for golfing, to provide the pure white look that is very much in demand. We count among our customers many prestigious golf clubs in Western Canada, including one customer located in Hawaii.

Glass Sand (Silwite® S-40)

Using ore from a sandy deposit that is 99.5 % pure silica, HCA Mountain Minerals produces flint grade glass sand of exceptional quality. Careful processing satisfies rigid glass making specifications

Particle Size - HCA Mountain Minerals has achieved a 100% screen cut product. The plant is geared to supply flint grade glass sand to particle sizes between 30 and 140 mesh with zero oversize and not more than 5% fines.

Iron Level - Iron in glass sand is also a critical factor. Specifications allow for a maximum of 0.0355%. Because of the nature of HCA Mountain Minerals' silica deposit and the Company's proprietary processing, this ranges as low as 0.0070%.

Fines - In order to keep furnace losses at a minimum and dust levels low, only up to 5% of -140 mesh can be contained in the sand. This specification is easily and consistently met.

Golf Course & Sandblast Sand (Silwite® S-12)

HCA Mountain Minerals as Moberly produces a white grade of "golf course sand" which is excellent for bunkers. Sandblast sand is also produced at this site.

Silwite® S-6, S10 & Other Grades

Other grades of quality silica are available. To discuss your specific needs please contact your distributor for more information on how we at HCA can fill your Silica needs.
