Indirizzo	KUKA Roboter GmbH Global Sales Center Hery-Park 3000 86368 Gershofen
Nazione	Germania

PRODOTTI O MACCHINARI

As a robotics pioneer, the KUKA Robot Group is one of the leading suppliers of industrial robotics. KUKA today offers a uniquely wide range of industrial robots and robot systems, covering all common payload categories and robot types. This means that KUKA always offers you the robot that is exactly customized for your application and industry, for example six-axis robots of all sizes, palletizers, gantry robots, cleanroom robots, robots made of stainless steel, heat-resistant robots, SCARA robots or welding robots. For standard or shelf-mounted robots and heavy-duty versions, mounting is possible on the floor or on the ceiling, making them multifunctional and flexible. The modular structure of KUKA robots means they can quickly and easily be reconfigured for other tasks.

All robots operate with a dependable PC-based control platform. This PC-based robot controller (KR C) allows you to use all the advantages of PC technology, such as remote diagnosis, Microsoft Windows interface, field bus, Soft PLC, OPC Server and much more. The standards set here by KUKA have convinced robot users worldwide and have made KUKA a world leader in the field of industrial robots with PC-based controllers. Our robot product range is complemented by task-related additional applications and by so-called hub technologies, based on the intelligent networking of controllers. Irrespective of the individual technologies involved, KUKA's product portfolio is characterized by an integrated system philosophy, top safety and reliability, a uniform look and feel, common operator control devices, and consistent maintenance and upgrade concepts. Finally, our international network of qualified system partners, robot integrators and system builders from the widest variety of industries serves to guarantee a robot solution, or a complete solution, that is exactly tailored to your requirements. We offer practical assistance in the implementation of your automation projects
