PRODOTTI O MACCHINARI

For over 50 years, KÖMMERLING has stood for quality, innovation and application expertise in the area of insulating glass sealants.

The story began in 1956, when the sealant sector developed from the area of adhesives. The subsequent rapid development of this division is intrinsically linked with advances made worldwide in the development of insulating glass.

KÖMMERLING's major breakthrough occurred in 1969, with the development of the first primerless, polysulphide-based, dual-component sealant. A further milestone in the history of insulating glass at KÖMMERLING followed some 15 years later, with the introduction of the very first low-viscosity polysulphide formulation for automated sealing systems.

KÖMMERLING's continuing efforts to develop innovative products are today reflected in a highly diverse range of products, which is tailored to optimally meet the application-specific requirements of our customers. Today, KÖMMERLING insulating glass sealants are sold in over 80 countries worldwide. Our continued efforts to provide quality, innovation and application expertise are rewarded by the loyalty of our customers.

Company Profile of **ADCO Köemmerling (Nanjing) Advanced Materials Co.,Ltd.**
