PRODOTTI O MACCHINARI

Clarity, precision and lightness. The seele group uses these concepts to realise the visions of renowned architects. The result is always customised structures and building shells that are often highly distinctive. seele offers a unique service and production range: from comprehensive consulting on development and production through to local final assembly. With over 1.000 employees at 14 locations worldwide, the group sets the standard in glass, steel, aluminium and membrane architecture. seele's history provides it with a deep understanding of the materials used. This expertise allows seele to create building shells with a minimal supporting structure and maximum transparency.

This makes it possible to create architectural landmarks like the Apple Cube in New York, the Strasbourg train station and the national stadium in Beijing. But seele also creates glass bridges and stairs that seem to defy gravity – as well as light surface load-bearing structures and elegant membrane structures. Since the company's founding in 1984, seele has represented the symbiosis of perfect craftsmanship and excellence in engineering. These roots form the basis for architecturally challenging but economical solutions. Worldwide.

Company Profile of **iconic skin GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
