PRODOTTI O MACCHINARI

Saint-Gobain Glass (SGG) has one high-quality float line in Qingdao plant and one advanced magnetron coating line with an annual capacity of 6 million square meters in Nanjing plant, which mainly produces energy saving soft coated glasses, such as Low-E and Solar control products.

In 2004, SGG became the first manufacturer providing tempered single silver low-E glass for Chinese market. In 2008 it led the market by providing tempered double silver ranges SGG Cool-Lite SKN II series. SGG also provided specialized energy-saving Glass curtain wall solutions among domestic market. Due to substantial investment in research and development, Saint-Gobain has been in a leading position in Low-E glass manufacturing sector.

The new state of the art coating facility will focus on the production of architectural and automotive window films providing safety and security, glare reduction, energy saving and CO2 emission reduction solutions for the Asian market.
